Investment Options

Age-based/Enrollment Year investment options:

The seven iShares Year-of-Enrollment Portfolios are based upon the designated beneficiary's anticipated year of enrollment, rather than the designated beneficiary's age. The asset allocation of the money invested in these investment options is automatically adjusted quarterly over time to become more conservative as the number of years to enrollment for the Designated Beneficiary decreases.

Static investment options:

The four iShares Asset Allocation Portfolios are designed to meet a specific risk profile and are offered in Aggressive, Moderate, Conservative and Fixed Income allocations. The asset allocation is reviewed at least annually and may be updated to take into account changes in risk and correlations of the asset classes and underlying investments. A dollar-cost averaging option provides for automatic monthly reallocations. The Custom iShares portfolio option offers seventeen individual portfolios investing in equity, real estate or fixed-income funds. A savings option invests in an FDIC-insured account.

Underlying investments:

iShares exchange traded funds (ETFs), BlackRock Fund Advisors, Sallie Mae
